

THE PHONE METADATA PROGRAM METADATA

ODNI released a bunch of the remaining phone dragnet primary orders (and amendments) [here](#). I will have more to say about this later. Of particular note, though, they seem to be withholding the BR 09-15 primary order, which was right in the middle of PATRIOT reauthorization, when NSA kept disseminating results in violation of Reggie Walton's orders.

1/19: Updated to add the 7/9/09 order and BR 09-19.

1/20: There is one more missing primary order. In an [NSA declaration](#) dated November 12, SID Director Theresa Shea said there had been 34 approvals. As shown above, the McLaughlin order is the 33rd of identified orders.

1/26: I think I've corrected all the date errors I originally hate (the date stamp is not all that accurate). For the 2011-2013 dates, I've worked backwards of the 4/25/13 order.
