SNUFFY: I'm no threat to you SkinnyMonkey, I'm just a person. And all you jews know that people don't kill people, guns kill people.

If any harm should come to you I would only participate and support it in the court of law. I just hope that if you have children that they have not benefited from your crimes. That would make them accomplices and subject to the same penalties.

On the other hand I would recommend not to Fuck with me Skinny, the older I get less I have to live for, and the less I have to live for the less the laws of this country will be able to influence my actions.

[QUOTE=Darth_Revan]Here on the forums I was given constant abuse for having dated a Jewish girl. The hatred towards me made me think; when does the hatred end? It doesn't. First it starts out with the Jews, and then it leads to people who look Jewish or are suspected of being Jewish. Where do you make the cut off?[/QUOTE]

SNUFFY: Actualy it starts with the niggers not jews. Jews usualy come latter due to their ability (control of the media) to never allow a bad light to shine upon them. But IMO if whites are to get through this alive, Xtianity will need a bullet.

[QUOTE=sean(doc)martin] Why do you continue to take the discussion away from the Jews?

SNUFFY: Because it is just as important if not more so to talk about those that broke trail for the Jews for the last 2000 years.

The nigger problem was caused by the Jews and the Jew problem was caused by White Xtians. Eliminating or seperating from the White Xtians is essential to White survival. If a Aryan Nation ever comes about, the Xtians must be excluded for all times at any cost!

SNUFFY: In the army my lieutenant told me Tim McVey read the Turner Diaries and that there was a blueprint for a truck bomb in it. After I was out of the service and was getting to the point of advanced anti-government libertarianism, I bought the book and when I was finished I was extremely disappointed that there was no plans for a bomb inside. It also brought up the question again that always went through my head when I had seen "Nazi" demonstrations on TV, "Why do they hate Jews so much?"

SNUFFY: I'm not around niggers much anymore but in the service I noticed this also. Funny as hell listening to them expanded vocabulary mode. What's even funnier is when they get real mad they latch on to a sentence fragment and repeat it over and over and over.

It is an already booming field and it is only going to grow in the next decades. There is financial security in it and less possibility of your job being outsourced overseas. From paramedic/first responder to RN and numerous other jobs you can develop skills which should prove usefull as our world continues to fall apart. Despite drawbacks such as on occasion having to deal with uppity muds, I'm of the opinion that this is an excellent field for WNs looking for decent employment to look into.

SNUFFY: This may sound hostile but don't take it personal, it's not directed at you. I have a deep seeded resentment for just about anyone with money. I hold them more responsible than I do the blue-collar guy, they are the white winners after all.

If things ever get real bad for me I will specifically target these people for the few hundred dollars in their wallet. It's as simple as going to a state or national park and waiting for some wealthy white family to roll up in a Mercedes or the like, make sure no one is around and off them all. The great thing about it is your doing something that benefits your race and your getting paid for it.

In the future government after the revolution I want the job of making piles of "white winners".

SNUFFY: I grew up in a small, almost all white logging town and boy did they ever think that diversity was the most wonderful thing that ever happened to humanity. A couple thousand niggers in one of these small white towns might just do them some good. Trauma is the only thing that the lemmings understand. WLP said they would be better off if the Jews were actually dropping bombs on them but in the long run niggers are the next best thing.

Two years ago I was driving over the Cascade Mountains on I-90 from the Washington coast to central Washington State and stopped to get gas at a small very small town and found it to be infested with niggers. I knew I had stumbled across one of those forced nigger dumps that I had heard of but never actually saw. There probably wasn't much industry up in the hills there, maybe a sawmill or a mine but that's it, so they must live off welfare or some type of assistance.

One thought that went through my mind was that there must only be few cops in the entire area and with no choppers it would make a nice training exercise.

If one is really concerned they should go spend the \$200 on a DNA test before they open their mouth. Last I read on the tests (and it's been a while) after 1/32 all that shows up is a marker on your genome and it can't be told how old it is but it stays there forever. Why do so many white people justify their weakness at every turn? ALL white people are ours, and it's our job to try to save and help each and every one of them if possible. Not to justify our own moral, physical and political weaknesses every chance we get!

R.James, WPI[/QUOTE]

Snuffy: Why do so many WN think we need to save all white people? Where do you come up with this shit? Did you drag it out of your church? You need to drop that Xian tendency to run around saving everything.

Our job is to do what is best for the white race and that means culling as many of the defects as possible. At this point one would be better of to pass up capping the nog and take out that nice white Xian lady down the street who just spent 10,000 dollars flying to Africa to bring back a couple of chimps to the Kwa. Let's kill the nogs latter when we have better resources to do so i.e. sarin gas, VX, cluster bombs ect. SNUFFY: When I lived in Wenatchee WA I worked as an electrician doing mostly new residential construction. When you got into a house or a development with a lot of spics around you would run the risk of showing up in the morning with the wire cut out of the job you did the day before. I knew a guy that had a small 240V to 24V transformer at home and I thought it would be satisfying if one night I were to wire it up in a reverse fashion between 120V and a bare #14 wrapped around a small but tempting roll of 6/3 hanging on the wall so it wouldn't ground out. But then I got to thinking about those things that Niggers never bother to think about.

I wasn't radical at that point but I can remember sitting on my bunk with a buddy watching news of a "Nazi" rally in DC around 98' and saying "I know why these guys don't like niggers and mexicans but why do they hate Jews?" It wasn't till around 2002/2003 when I stumbled onto Stormfront and found a link to William Pierce's broadcasts that I realized I was at war and didn't even know it. SNUFFY: The power grid is a very easy target but it is only good for harassment in most cases unless you have the manpower to keep it up for a few weeks during a heatwave or a deep freeze (I prefer deep freeze). The best way to target it would be to cut off generating stations thus forcing more load on the remaining ones. If you could cut off multiple stations within a short time period the remaining ones would be forced to absorb the load and hopefully start to trip there over current protection which basically disconnects them from the grid and forces even more load onto the remaining generating stations. This cascades through the entire grid until it isolates itself. That is how a large blackout results from what is generally a much smaller problem. The only drawback to this kind of attack is I happen to use electricity too.
