

# **WHAT A ROOMFUL OF REPUBLICAN BIOTECH- PAID WHORES LOOKS LIKE**

As the NYT reported earlier today, Genentech/Roche wrote a Republican script and a Democratic script for its parrots to enter into the Congressional Record. Here's what the Republican script looks like (I'm going to try to do the Democratic one next—but this is tedious stuff; and yes, Heath Shuler was working from the Republican script).

**“I oppose this bill  
but love the  
appropriate balance  
it gives to  
monopolistic  
biologics”**

**Joe Wilson**

I have criticized many of the provisions of this bill (H.R. 3962) and rightfully so. But in fairness, I do believe the sections relating to the creation of a market for biosimilar products is one area of the bill that strikes the appropriate balance in providing lower cost options to consumers without destroying a healthy and functioning industry in this country.

**Jerry Moran**

Mr. Speaker, after reviewing H.R. 3962, the Affordable Health Care for America Act, listening to the concerns of Kansans, and visiting Kansas hospitals to speak with doctors,

nurses, patients, and administrators, I have concluded that this bill will be harmful to Kansas and I strongly oppose it. However, I do believe the sections relating to the creation of a market for biosimilar products is one area of the bill that strikes the appropriate balance in providing lower cost options to patients without destroying a healthy and functioning industry in this country.

**Kay Granger**

Mr. Speaker, I have criticized the majority of the provisions in H.R. 3962, the Affordable Health Care for America Act, and I will vote against it. However, I am pleased that H.R. 3962, as well as the Republican Substitute Amendment that I support, both include language relating to biosimilar products.

**Lee Terry**

Mr. Speaker, I have criticized many of the provisions of this bill and rightfully so. But in fairness, I do believe the sections relating to the creation of a market for biosimilar products is one area of the bill that strikes the appropriate balance in providing lower cost options to consumers without destroying a healthy and functioning industry in this country.

**Ted Poe**

I am strongly against H.R. 3962, and I will vote against it should it come to a vote on the House floor. However, I do believe the sections relating to the creation of a market for biosimilar products is one area of the bill that strikes the appropriate balance in providing lower cost options to consumers without destroying a healthy and functioning industry in this country.

**Blaine Luetkemeyer**

Mr. Speaker, I have criticized many of the provisions of this bill and rightfully so. However, one bi-partisan area that strikes the

appropriate balance in providing lower-cost options to consumers without destroying a healthy and functioning industry in this country that is included in both the underlying bill, which I strongly oppose, and the Republican substitute, which I intend to support, are the sections relating to the creation of a market for biosimilar products.

**Lynn Jenkins**

Mr. Speaker, I have criticized many of the provisions of this bill and rightfully so. However, I do believe the sections relating to the creation of a market for biosimilar products is one area of the bill that strikes the appropriate balance in providing lower cost options to consumers without destroying a healthy and functioning industry in this country.

**Mike Conaway**

Mr. Speaker, I have criticized many of the provisions of H.R. 3962, the Affordable Health Care for America Act, and with good reason. However, I believe that the creation of a market for biosimilar products is one area of the bill that strikes the appropriate balance in providing lower cost options to consumers without destroying a healthy and functioning industry in this country.

**Darrell Issa**

Despite this bill's many faults, I support the bill's language establishing a market for biosimilars which balances the desire to provide cheaper biologics with the need to continue incentivizing investment in research and development.

**Kevin McCarthy**

These are some of the many concerns I have with H.R. 3962, which is why I instead support the Republican health care alternative. The alternative excludes the unnecessary and burdensome excise tax in H.R. 3962, and also

includes a responsible pathway for follow-on biologics by including provisions from the Pathways for Biosimilars Act, which I am a proud cosponsor of.

[snip]

But we need solutions that strike a balance in reducing health care costs, strengthening health care access, and allowing health innovators, like our biotech industry, to continue to research and improve therapies for patients.

**Heath Shuler**

Mr. Speaker, as you know I am opposed to the bill we are considering today for many reasons that I have articulated previously. I am pleased, however, that the bill strikes the appropriate balance on the issue of follow on biologics. This bipartisan compromise language will provide lower cost options to consumers and my constituents without destroying a healthy and functioning bio-tech industry in this country.

## **“Creating a pathway with incentives”**

**Joe Wilson**

Creating a pathway for new products that doesn't destroy the ability or the incentives for innovator companies to develop breakthrough technologies and at the same time providing a safe and effective way to bring competition to benefit patients is a laudable achievement.

**Jerry Moran**

Creating a pathway for new products that does not destroy the ability or the incentives for innovator companies to develop breakthrough technologies and, at the same time providing a safe and effective way to bring competition to benefit patients and encourage treatments, is a necessary objective.

**Kay Granger**

Creating a pathway for new products that doesn't destroy the ability or the incentives for innovator companies to develop breakthrough technologies and at the same time providing a safe and effective way to bring competition to benefit patients is a laudable achievement.

**Lee Terry**

Creating a pathway for new products that doesn't destroy the ability or the incentives for innovator companies to develop breakthrough technologies and at the same time providing a safe and effective way to bring competition to benefit patients is a laudable achievement.

**Ted Poe**

Creating a pathway for new products that doesn't destroy the ability or the incentives for innovator companies to develop breakthrough technologies and at the same time providing a safe and effective way to bring competition to benefit patients is a laudable achievement.

**Blaine Luetkemeyer**

Creating a pathway for new products that doesn't destroy the ability or the incentives for innovator companies to develop breakthrough technologies and, at the same time, providing a safe and effective way to bring competition to benefit patients is a laudable achievement.

**Lynn Jenkins**

Creating a pathway for new products that doesn't destroy the ability or the incentives for innovator companies to develop breakthrough technologies and at the same time providing a safe and effective way to bring competition to benefit patients is a laudable achievement.

**Mike Conaway**

Creating a pathway for new products that does not destroy the ability or the incentives for innovator companies to develop breakthrough technology and at the same time provide a safe

and effective way to bring competition to benefit patients is a creditable achievement.

**Heath Shuler**

I believe it is critical that the creation of a pathway for new products does not destroy the ability or the incentives of innovator companies to develop breakthrough technologies. We have a moral obligation to provide a safe and effective pathway of bringing competition that will benefit patients.

## **“I wish upon a star”**

**Joe Wilson**

I wish we could remove this provision from this fatally flawed piece of legislation and consider it separately because it would pass with the kind of overwhelming bi-partisan support that Americans across the country wish to see.

**Jerry Moran**

I wish we could remove these specific provisions from H.R. 3962 and consider them separately because it would most likely pass with the kind of overwhelming bipartisan support.

**Kay Granger**

I wish we could remove this provision from this bill so that I could vote for it on its own. I believe that if this provision was considered on its own it would pass the House of Representatives with bipartisan support.

**Lee Terry**

I wish we could remove this provision from this fatally flawed piece of legislation and consider it separately because it would pass with the kind of overwhelming bi-partisan support that Americans across the country wish to see.

**Ted Poe**

I wish we could remove this provision from this fatally flawed piece of legislation and consider it separately because it would pass with the kind of overwhelming bi-partisan support that Americans across the country wish to see.

**Blaine Luetkemeyer**

I wish we could remove this provision from this fatally flawed piece of legislation and consider it separately because it would pass with the kind of overwhelming bi-partisan support that Americans across the country wish to see.

**Lynn Jenkins**

I wish we could remove this provision from this fatally flawed piece of legislation and consider it separately because it would pass with the kind of overwhelming bipartisan support that Americans across the country wish to see.

**Heath Shuler**

I wish we could consider this as a stand-alone bill because it would pass with the kind of overwhelming bi-partisan support that Americans across the country wish to see.

## **“A homegrown success story!!!”**

**Joe Wilson**

One of the reasons I have long supported the U.S. biotechnology industry is that it is a homegrown success story that has been an engine of job creation in this country.

**Kay Granger**

One of the reasons I have long supported the U.S. biotechnology industry is that it is a homegrown success story that has been an engine of job creation in this country.

**Lee Terry**

One of the reasons I have long supported the

U.S. biotechnology industry is that it is a homegrown success story that has been an engine of job creation in this country.

**Ted Poe**

One of the reasons I have long supported the U.S. biotechnology industry is that it is a homegrown success story that has been an engine of job creation in this country.

**Blaine Luetkemeyer**

One of the reasons I have long supported the U.S. biotechnology industry is that it is a homegrown success story that has been an engine of job creation in this country.

**Lynn Jenkins**

One of the reasons I have long supported the U.S. biotechnology industry is that it is a homegrown success story that has been an engine of job creation in this country.

**Heath Shuler**

One of the reasons I have long supported the U.S. biotechnology industry is that it is a homegrown success story that has been an engine of job creation in this country and in my home state of North Carolina.
