

SCORECARD: SNOWDEN-RELATED PUBLICATION OF VERIZON'S NAME — 1. ODNI PUBLICATION OF VERIZON'S NAME — 1.

Would you lookee here?

Sometime between the time I published this post – showing ODNI did not redact anything in this passage of the January 20, 2011 phone dragnet primary order ...

thereafter for the duration of this order, unless other
electronic copy of the following tangible things: all
metadata" created by Verizon for communications (
abroad; or (ii) wholly within the United States, inclu

... And this afternoon, ODNI swapped out the document such that that passage now looks like this:

thereafter for the duration of this order, unless otherwise
electronic copy of the following tangible things: all call c
metadata" created [REDACTED] for communications (i) bet
abroad; or (ii) wholly within the United States, including

I guess maybe James Clapper's office figured it would be hard to spew their defector propaganda if they themselves had published some of the same material.

We all know how Clapper strives to cover up his own crimes.

Except they did publish it.

Meaning ODNI has caused Verizon's name to be published in conjunction with the phone dragnet as many times as Edward Snowden has. I wait with

bated breath for the ill-considered “Traitor!!!”
cries to be directed against Clapper.

Update: To be clear, as I noted on this post, I
didn't find this particular redaction error
(I've got some more ... interesting ones). Michael
alerted me to it on Twitter. I just decided to
point out that ODNI had tried to cover this up.
