

OPEN THREAD: ANGST

It's the last weekend in February; I think Edvard Munch's 'The Scream' did such a fine job last weekend I'll enlist another of his works to close this month. This one is called

'Anxiety' in English. In Norway they call it 'Angst'. I think the latter is far more fitting based on definition.

We haven't yet sunk into madness – March Madness, that is. (Don't forget to fill out your bracket if you're into that collegiate basketball-induced insanity.)

But we are definitely suffering from a collective existential dread. How will we climb out of this hole and fix this mess?

In the mean time, dump your burden here. Make light while you can. Remember Tuesday is Mardi Gras, the last guilt-free celebration until Easter for those of who are Catholic or Catholic-by-heritage. Offload your angst in comments and celebrate while you can without a side-eye or shade.
