

THE COLLECTIVE RESPONSE TO RUSSIA'S UKRAINE INVASION

Yesterday, the government rolled out two hacking indictments from last year as part of its effort to use legal documents to expose Russian spying operations. While the indictments are important speaking documents, I realized from the response that the subset of journalists who focus primarily on cybersecurity were unaware that this effort was part of a larger effort to demonstrate Russia's spying that DOJ (and, surely, other agencies of the IC) have been pursuing since the Russian invasion.

So I wanted to start collecting all instances here as a way to see the entire package of what DOJ is doing. I'll try to keep this up-to-date.

February 22, 2022: Treasury sanctions Russian banks

Individual targets include Denis Aleksandrovich Bortnikov, Petr Mikhailovich Fradkov, Vladimir Sergeevich Kiriyeenko.

(press release)
