

TECHNICAL EXHIBITS, MICHAEL SUSSMANN TRIAL

Thanks to those who've donated to help defray the costs of trial transcripts. Your generosity has funded the expected costs of transcripts. But if you appreciate the kind of coverage no one else is offering, we're still happy to accept donations. This coverage reflects the culmination of eight months work.

Most of my coverage during the Michael Sussmann trial will be trial related, describing what witnesses and exhibits say about the case.

But there are good reasons to question the conduct of the investigation – and that's a topic a lot of people have independent interest in. So I wanted to start a running post on technical issues.

If there's a link that doesn't work, it probably means I've forgot to set permissions to public (some of this needs redaction before posting). Leave a comment or tweet me at @emptywheel.

FBI investigation

160921 Allison Sands' Lync Notes (thru 161012)
