

# THE LAPTOP EVERYONE KNOWS AS HUNTER BIDEN'S APPEARS TO HAVE BEEN DELETED STARTING FEBRUARY 15, 2019

I've been wading through Hunter Biden data all weekend. There's some evidence that the descriptions of the "Hunter Biden" "laptop" based on the drive Rudy Giuliani has peddled do not match the description of what should be on such devices given what the FBI and IRS saw.

Before I explain that, though, I want to talk about how the life of Hunter Biden's iCloud account differs from what is portrayed in this analysis paid for by Washington Examiner.

As that report describes, Hunter Biden activated a MacBook Pro on October 21, 2018, then set it up with Hunter's iCloud on October 22. Hunter then used the MacBook as his primary device until March 17, 2019, a month before it waltzed into John Paul Mac Isaac's computer repair shop to start a second act as the biggest political hit job ever.

Device Name	Device Added Date	Device Serial Number	Device Last Heartbeat IP
Robert's iPad	01-16-2019 4:48:33	DLXQL4EUGMLD	73.61.117.110
iPhone	01-14-2019 3:31:58	G0NXF19JKPFY	107.77.223.136
Robert's MacBook Pro	10-22-2018 23:45:43	FVFXC2MMHV29	73.61.117.110

There are problems with that story. A longer table of the devices that logged into Hunter Biden's iCloud includes devices that appear to have been accessing core Hunter Biden content.

That same table doesn't show any access after November 15, 2018, with the last access being the device Roberts MacBook Pro that would end up in a Delaware repair shop, but showing up six days earlier than it should. There's a phone that should but does not show up in those

devices, too.

The report doesn't discuss the import of the shifts between these emails.

RHB used several emails for business and personal use including:

- DOIDHUNTER88@GMAIL.COM [sic]
- RHBDC@ICLOUD.COM (RHBDC@ME.COM)
- RHB@RSPDC.COM
- HBIDEN@ROSEMONTSENECA.COM
- HBIDEN@SENECAGA.COM

One email missing from this list is a Gmail account under which a bunch of passwords were stored. That'll become important later.

The most important email is the Gmail account (misspelled above), droidhunter88@gmail.com, which Hunter Biden used to contact sex workers, probably including the Russian escort service that the IRS used to predicate the IRS investigation. That email account got added to his iCloud account at the same time as his iCloud contents were requested, and then again before the MacBook stopped being used. Those changes often happened in conjunction with changes to the phone number.

For now, though, I just want to map out the major events with Hunter's iCloud accounts from September 1, 2018 (perhaps the months before the IRS would open an investigation into him because he was frequenting a Russian escort service) until the final email as found on the laptop itself. There's a bunch more – one after another credit card gets rejected, and he keeps moving

his Wells Fargo card over to pay for his Apple account; the iCloud account shows Hunter reauthorizing use of biometrics to get into his Wells Fargo account in this period.

In January 2019, the Gmail account Hunter Biden used to contact sex workers (probably including the Russian escort service he had been using) effectively took over his iCloud account and asked for a complete copy of his iCloud account. Then, the next month, all the data on the Hunter Biden laptop was deleted.

Update: I've taken the reference to the HB RediPhone out altogether—it's clear that's a branded iPhone—and replaced it with a better explanation of the other devices.

Update: I see that he does have D[r]oidhunter88, but doesn't discuss the import of it.

Update: I've added a few things that happened while Hunter's account was pwned. Importantly, as part of this process an app called "Hunter" was given full access to his droidhunter88 gmail account. There are also a few emails that seem to be a test process.

Update: Added the missing Gmail account.

While Hunter is in Ketamine treatment at Keith Ablow's, a service called "Hunter" gets access to the droidhunter88 gmail account

1/16/19: Here's my first tip for you!

1/16/19: Hi Robinson, Hunter now has access to your Google Account droidhunter88@gmail.com.

Hunter can:

View your email messages and settings

Manage drafts and send emails

Send email on your behalf

A bunch of things happen in this four day period: first, someone accessed droidhunter88 from a new iPhone. Someone changed the phone number for the Hunter Biden iCloud. Then, droidhunter88 was given access to the iCloud account. Then the iCloud account ordered all of Hunter's iCloud contents. Then the password for the account was reset.

1/17/19: New device signed in to droidhunter88@gmail.com Your Google Account was just signed in to from a new Apple iPhone device.

1/17/19: I am here to help you find the emails you need!

Giovanni here from Hunter.

I wanted to quickly check if I can help you getting started with Hunter.

There are plenty of functionalities included with your free plan that will allow you to find, verify and enrich a set of data in bulk: these are all explained in our video guides.

However, if you already have a precise task to perform, reply to this email so I can better assist you!

The droidhunter88 account bought a new iPhone – but, after telling Apple they would recycle the old one, instead kept it. That would effectively be another device associated with Hunter Biden. Given some of the other apps involved, this may have served as a way to get Hunter Biden's calls (eg, from Mac Isaac). Unlike the new devices that show up in 2018, this one was paid for.
