

THE DOCUMENT FOUND WITH ROGER STONE'S CLEMENCY DID PERTAIN TO EMMANUEL MACRON

Just days before the snap election Emmanuel Macron recklessly called after Marine Le Pen shellacked his party in the EU elections, we are one step closer to showing a tie between the still unexplained grant of executive clemency to Roger Stone found in the search of Mar-a-Lago and the French President.

As I have described in the past, the first thing listed on the non-privileged search warrant return was an executive grant of clemency for Trump's rat-fucker. Most people have always assumed that it was one of the known grants of clemency – either the commutation or the later pardon – for Stone's lying to cover up his 2016 ties to Russia.

Except as listed, it is associated with, "Info re: President of France."

1 - Executive Grant of Clemency re: Roger Jason Stone, Jr.
1A - Info re: President of France
2 - Leatherbound box of documents
2A - Various classified/TS/SCI documents
3 - Potential Presidential Record
5 - Binder of photos
6 - Binder of photos
7 - Handwritten note
8 - Box labeled A-1

There had been reports that the President of France in question was Macron. Trump's defense attorneys seem to have confirmed that.

That confirmation comes as part of a Trump bid to dismiss the entire stolen documents prosecution because the FBI jumbled the order in

which documents were found during and after the search. Both before and after the problem with the order of the documents first became understood, in March and then May, Jack Smith's office did some interviews with the Miami-based agents who did the filter process, which Trump included as exhibits.

As described, the agents exercised varying diligence about maintaining the order of documents in each box; as Agent 5 explained, keeping the order intact was made more difficult because of the contents of the boxes, in which Post-It notes and golf balls were stashed in the same boxes with potentially privileged documents (I can't make out the first word in this series).

"To best of my ability" FBI 5 kept contents in order
impossible to maintain exact order
letters, newspapers, post-it notes, golf balls etc

As Agent 17 described, he and Agent 5 did the filter search of Trump's own desk together as another agent found the box in the closet where the most sensitive classified documents were found (note: it's clear agents were also being asked about the 43 classified cover sheets allegedly found in that box; Trump's silence on this point suggests others gave clear answers about it).

FBI 17 and 5 to floors desk first, FBI 17 to one side FBI 5 to other
FBI 5 found Macron doc in desk
FBI 17 went to target day before → used tape on
desk to seal as definitely privileged material
inside
FBI 13 went to closet, spent a lot of time
on box on floor - looks at possible inside
FBI 17 saw pic being set up, doesn't know who set up
Remembers seeing cover sheets, never seen these
types before → doesn't know where they came from
Per. 34 desk → FBI 17 started on left side
no privileged or responsive docs found
KJU letters in desk drawer

As Agent 17 described it, Agent 5 found "Macron doc in desk," though makes no mention of the clemency associated with it.

Note there was a set of "KJU letters" – the love

letters from Kim Jon Un to Trump – in a desk then occupied by Molly Michael, identified as Person 34 in other releases. Trump had returned at least some of these in the January 2022 boxes.

It's not yet clear how the Macron document, classified Secret, relates to the Stone clemency. But as I wrote here, such a tie could be quite significant: when Scott Brady (the MAGAt US Attorney whose claims to have vetted the Alexander Smirnov hoax were just referred to DOJ for potential prosecution as a false claim to Congress) indicted GRU hackers for operations that included the 2017 MacronLeaks that attempted to help Le Pen in her election against Macron, the indictment claimed to be ignorant of the public details tying Roger Stone associates to the dissemination of the stolen documents.

The Macron document does not appear to be among those charged, so we may never learn more about why Trump had a Stone grant of clemency – and possibly a bunch of other pardons – in his desk drawer.

Note, in addition to exhibits documenting the Mar-a-Lago search, Trump's lawyers helpfully provided this description of the documents found among the boxes Trump returned in January 2022, two of which required especially sensitive treatment.
