

# TOYOTA SINGS THE MERCURY BLUES

As the Republicans in Congress, most notably the Senate fixate on emasculating the stimulus package, stripping it and the country of hope, I want to return to another recent example of the un-American activities and bent of this group of legislative geniuses. I refer to this same group's actions and illogic in relation to willingness to kill or cripple American Auto manufacturing under the false guise it is not as good or efficient as foreign makers. Recent news from Toyota puts the lie to another Republican claim.
