

# THE THREE THEORIES OF PROSECUTION FOR JULIAN ASSANGE

There are three theories of prosecution EDVA used in the superseding indictment against Julian Assange. One charges him for soliciting the leaks of stolen information, which will endanger people like Jason Leopold. One charges him for attempting to help hack and therefore obtain classified information, which is relatively risk free. And one charges him for disclosing the identities of US sources, which is dangerous because, on a smaller scale, journalists do the same.
