

SOMETHING HAPPENED TO OUR PLANET

Something happened to our planet, and it was us. The upshot is that it is getting insane. People yammer about how hot it is currently in Phoenix. It has always been thus, but it no longer

cools off at night. The high temperatures are not the problem so much as the the overall heating. Including that the cool off at night no longer happens.

Climate change and heat sinking.

But, together, they really do matter. A lot. Both can be minimized if humans are not stupid. Do not count on that happening. Because humans are stupid.

But the kids today, and their kids, will make the future. They can make a difference in their own schools and communities. Starting now.

This is book for kids. But a really helpful, and useful, one.

Many, if not most, of the people that frequent here won't be around in fifty years to see how it all goes, but you can school up those next generations. This book can help. It is a great starting point.

As an adviso, the author is a friend and relative of mine. But I would not recommend it if I did not truly believe in her and her work.
